Each bottle yields 64-128 uses

We Just Set the Industry Standard!

PROSTAR

ProSTAR Soda Nozzle Cleaner Vs. Other Methods for Cleaning Nozzles

A significant volume of carbonated beverages are consumed daily. There is a level of implied safety in carbonated beverages that consumers have come to expect. Accumulation in a soda nozzle and diffuser can harbor bacteria or mold and contaminate the beverage. Too often soda nozzles are either not cleaned or cleaned improperly. ProSTAR's Soda Nozzle Cleaner can save you labor and time by combining all the necessary steps into one easy solution! No more washing then scrubbing then rinsing and then sanitizing. Keep in mind that soiled nozzles are considered a critical violation at the health department.

ProSTAR Soda Nozzle Cleaner

- Properly removes soil
- Properly removes mold & bacteria
- Simply easy to follow procedures
- No bitter or "bleach" aftertaste
- No scrubbing
- Removes dyes
- Restores nozzle to like new condition
- Eliminates labor and time of ordering new nozzles
- Includes 1/2 ounce measuring cup

Bleach

Does kill bacteria, BUT....
Does not run clean
Will ruin rubber O-rings
Scrubbing is still required
Leaves a bitter taste
Does not remove dye (i.e. red soda dye)
Toxic, hazardous and will discolor clothes
Does not have standard procedures for use
No measuring standard or device

Water or Mild Cleaner

Does not clean
Does not sanitize
Scrubbing is still required
Does not have a standard procedure for use
No measuring standard or device
